

Delphine's dollhouse gift box

(good things come in small packages)

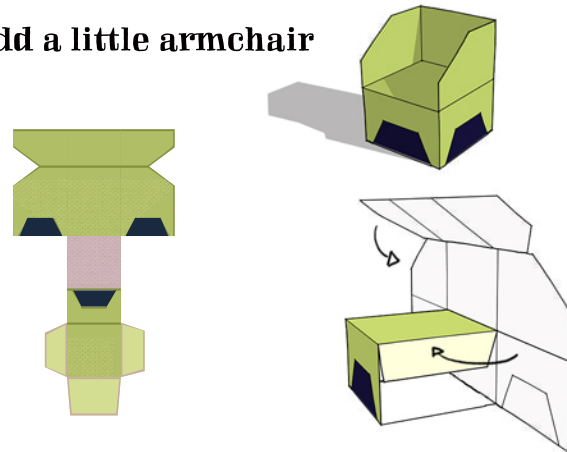

A project for the experienced crafter.

Cut out, fold and glue in the tray

This will divide your tray in two. Put your tiny gift in the yellow partition.

Add a little armchair

Glue it on the carpet.
(not yours, the one inside the box)

Fold and glue the green tab on the armchair.
(this is the smallest cushion you will ever make)

Or you can cut out and paste this one
(it's more easy)

If you like it more lively,
you might want to add the tiniest cat.

This doll house was designed to fit a small matchbox of 3.5x5.3x1.5 cm (approximately 2 inches high)

Fold and glue around the box.
